1 Executive Summary

Arun Precision Components Pvt Ltd proposes a manufacturing project at SIDCO Industrial Estate, Kurichi, Coimbatore, Tamil Nadu for CNC-machined shafts and flanges for pump and valve OEMs. The purpose is business expansion, machinery purchase, bank loan.

Total project cost is ₹196.80 L, funded by promoter contribution of ₹71.80 L (36%) and a term loan of ₹125.00 L from Indian Bank, Kurichi branch, with a working capital limit of ₹44.00 L.

At 60% capacity utilisation in FY27-28, revenue is projected at ₹302.40 L, rising to ₹541.62 L by FY33-34. Profit after tax grows from ₹13.88 L to ₹71.49 L. Average DSCR over the loan period is 2.69× with a minimum of 1.54×. The project breaks even at 63% of sales in FY29-30.

Project cost	Promoter contribution	Term loan	Average DSCR
₹196.80 L	**₹71.80 L** 36% of cost	**₹125.00 L** Indian Bank, Kurichi branch	**2.69×** Minimum 1.54×

Project at a glance

Particular	Details
Name of the enterprise	Arun Precision Components Pvt Ltd
Constitution	Private Limited Company
Proposed activity	CNC-machined shafts and flanges for pump and valve OEMs
Location	SIDCO Industrial Estate, Kurichi, Coimbatore, Tamil Nadu
Products	Machined pump shafts, Valve flanges (DN50–DN150)
Purpose	Business Expansion, Machinery Purchase, Bank Loan
Total project cost	₹196.80 L
Means of finance	Promoter ₹71.80 L · Term loan ₹125.00 L
Working capital limit	₹44.00 L
Lender	Indian Bank, Kurichi branch
Employment	16 persons
Revenue FY27-28 to FY33-34	₹302.40 L to ₹541.62 L
Break-even (FY29-30)	63% of sales
Project IRR / payback	17.9% · 3.6 years

2 Promoters and Management

R. Arun Kumar, Managing Director, holds B.E. Mechanical and has 18 years of industry experience. Shareholding 60%, declared net worth ₹85.00 L.

S. Meena, Director (Finance), holds M.Com, ICWA (Inter) and has 14 years of industry experience. Shareholding 40%, declared net worth ₹42.00 L.

Name	Role	Qualification	Experience	Share	Contribution
R. Arun Kumar	Managing Director	B.E. Mechanical	18 yrs	60%	₹42.00 L
S. Meena	Director (Finance)	M.Com, ICWA (Inter)	14 yrs	40%	₹29.80 L

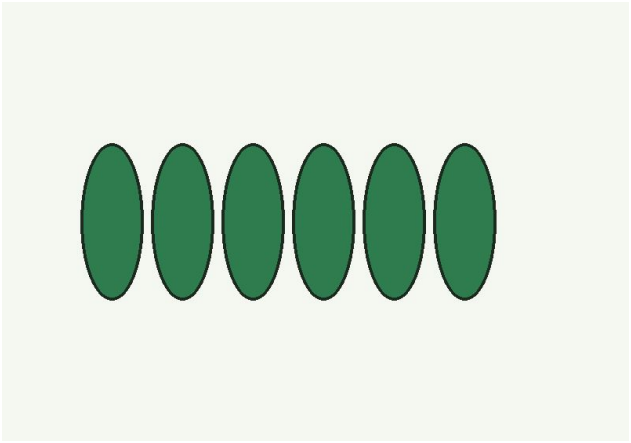

The promoters will be responsible for the overall management of the enterprise, including production, marketing, finance and compliance. They will be supported by a team of 16 employees, detailed in the manpower section.

3 Company Profile

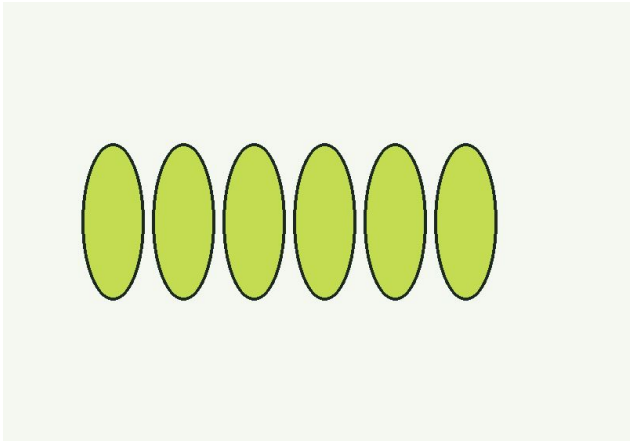

Particular	Details
Name	Arun Precision Components Pvt Ltd
Constitution	Private Limited Company
Registration no.	U28999TZ2019PTC031245
PAN / Tax ID	AAHCA1234K
GST / VAT	33AAHCA1234K1Z5
MSME / Udyam	UDYAM-TN-03-0045123
Date of incorporation	2019-06-14
Project location	SIDCO Industrial Estate, Kurichi, Coimbatore, Tamil Nadu
Proposed commencement	2027-04-01
Implementation period	8 months

4 Products and Capacity

The enterprise will manufacture and sell 2 products: Machined pump shafts, Valve flanges (DN50–DN150). The installed capacity, selling prices and planned capacity utilisation are given below.

Machined pump shafts

Valve flanges (DN50–DN150)

- **Machined pump shafts:** Precision machined component made to drawing, used in pumps and valves.
- **Valve flanges (DN50–DN150):** Precision machined component made to drawing, used in pumps and valves.

Product	Unit	Installed capacity / year	Selling price (₹)	Price growth
Machined pump shafts	nos	60,000	450.00	3% / yr
Valve flanges (DN50–DN150)	nos	30,000	780.00	3% / yr

The unit will operate 2 shift(s) of 8 hours for 300 working days a year. Capacity utilisation is assumed to start at 60% in the first year and stabilise at 90%, allowing time for market development and stabilisation of operations.

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
Capacity utilisation	60%	70%	80%	85%	90%	90%	90%
Machined pump shafts (sales)	162.00	194.67	229.15	250.78	273.50	281.70	290.15
Valve flanges (DN50–DN150) (sales)	140.40	168.71	198.60	217.34	237.03	244.14	251.47
Total revenue	302.40	363.38	427.75	468.12	510.53	525.85	541.62

5 Market Analysis

The project serves demand for machined pump shafts and valve flanges (dn50–dn150). The manufacturing sector in Tamil Nadu is served by a mix of organised and small units.

Manufacturing demand in India is supported by infrastructure spending, the shift of supply chains toward domestic producers, and government programmes that favour locally made goods. Buyers increasingly prefer suppliers who can offer consistent quality, short lead times and dependable after-sales support, which gives well-run regional units an advantage over distant or imported supply.

Target customers

The products will be marketed in Tamil Nadu and neighbouring markets. The enterprise will serve buyers who value quality, timely delivery and competitive pricing.

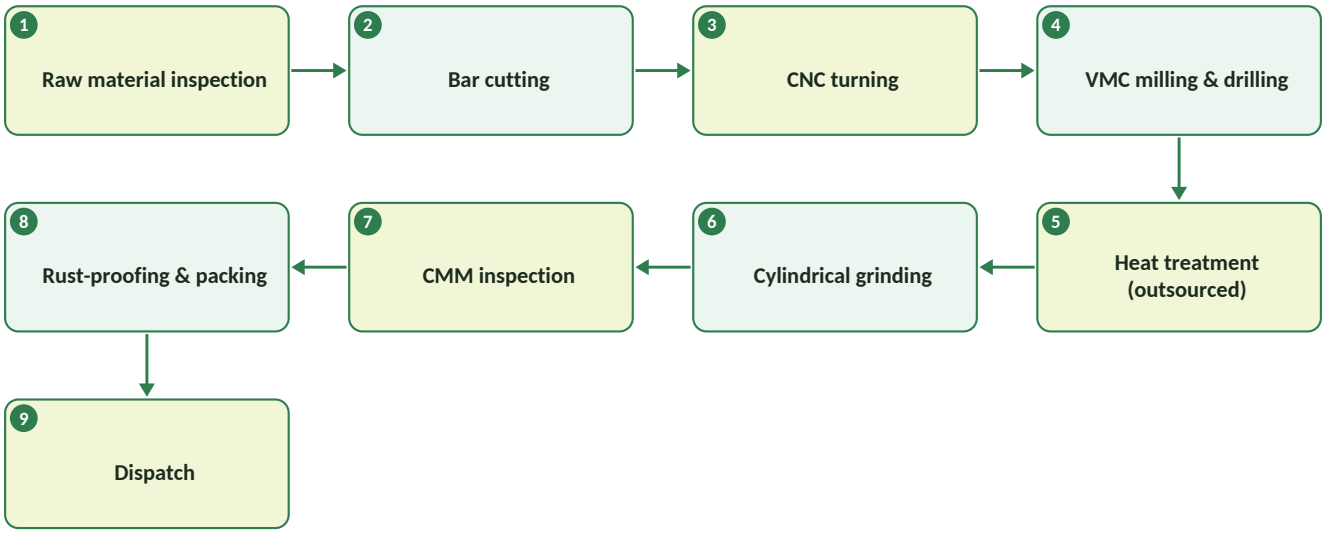

Marketing strategy

The unit will sell through a mix of direct sales to industrial and institutional buyers, appointed dealers and distributors in the surrounding districts, and participation in government and corporate tenders. Pricing will be set competitively against established brands while protecting margins through efficient production. Product samples, test certificates and prompt delivery commitments will be used to win first orders, followed by rate contracts with repeat buyers.

6 Technical Feasibility and Process

The technology and equipment required for the project are well established and readily available in India. Machinery will be sourced from reputed suppliers against firm quotations, and suppliers will provide installation, commissioning and operator training.

Process flow

Plant, machinery and equipment

Description	Category	Qty	Rate (₹)	Amount (₹ lakhs)	Quotation / supplier
Shed modification, flooring and foundations	Building	1	20,00,000	20.00	Civil estimate — V. Raj Associates
CNC turning centre, 8" chuck	Plant & Machinery	2	28,00,000	56.00	Quote LMW/2026/118
Vertical machining centre 850 mm	Plant & Machinery	1	32,00,000	32.00	Quote BFW/VMC/5521

7 Location, Utilities and Inputs

Location and infrastructure

The project is located at SIDCO Industrial Estate, Kurichi, Coimbatore, Tamil Nadu. The selected location offers access to road transport, availability of skilled and semi-skilled labour, and proximity to raw material suppliers and customers. Power, water and other utilities required for the operation are available at the site.

Power and utilities

Parameter	Value
Connected load	150 kW
Operating hours per day	16
Working days per year	300
Load factor	60%
Tariff	₹8.00 per kWh
Annual consumption at full capacity	4,32,000 kWh
Power cost in FY27-28	₹20.74 L

Raw materials

Raw materials are available from established suppliers in the region. Prices are assumed to rise by 3% a year. Raw material cost per unit of output:

Product	Raw material cost / unit (₹)	FY27-28 raw material cost (₹ lakhs)
Machined pump shafts	210.00	75.60
Valve flanges (DN50–DN150)	360.00	64.80
Total		140.40

Manpower

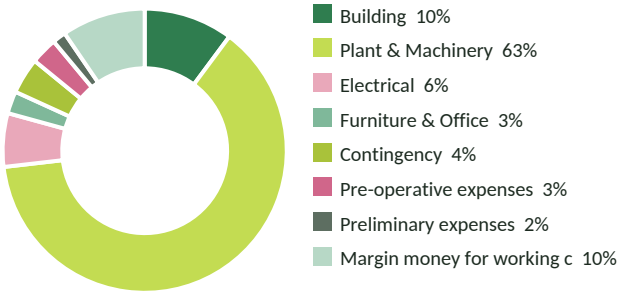

The project will employ 16 persons. Salaries are assumed to rise by 6% a year, with statutory benefits (PF, ESI, bonus) at 20% of salary.

Position	Number	Monthly salary (₹)	Annual cost (₹ lakhs)
Plant manager	1	60,000	8.64
Production engineers	2	45,000	12.96
QC inspector	1	25,000	3.60
CNC operators (skilled)	4	22,000	12.67
Helpers (semi-skilled)	6	14,000	12.10
Accounts & admin	2	18,000	5.18
Total	16		55.15

8 Cost of Project and Means of Finance

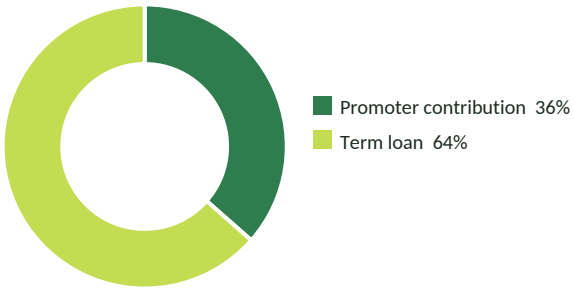

The total cost of the project is estimated at ₹196.80 L. It will be financed by a promoter contribution of ₹71.80 L (36%) and a term loan of ₹125.00 L. A working capital limit of ₹44.00 L is proposed separately.

Cost of project	₹ lakhs	Share
Building	20.00	10%
Plant & Machinery	124.00	63%
Electrical	12.00	6%
Furniture & Office	5.00	3%
Contingency	8.05	4%
Pre-operative expenses	6.00	3%
Preliminary expenses	3.00	2%
Margin money for working capital	18.75	10%
Total	196.80	100%

Cost of project

Means of finance	₹ lakhs	Share
Promoter contribution	71.80	36%
Term loan	125.00	64%
Total	196.80	100%

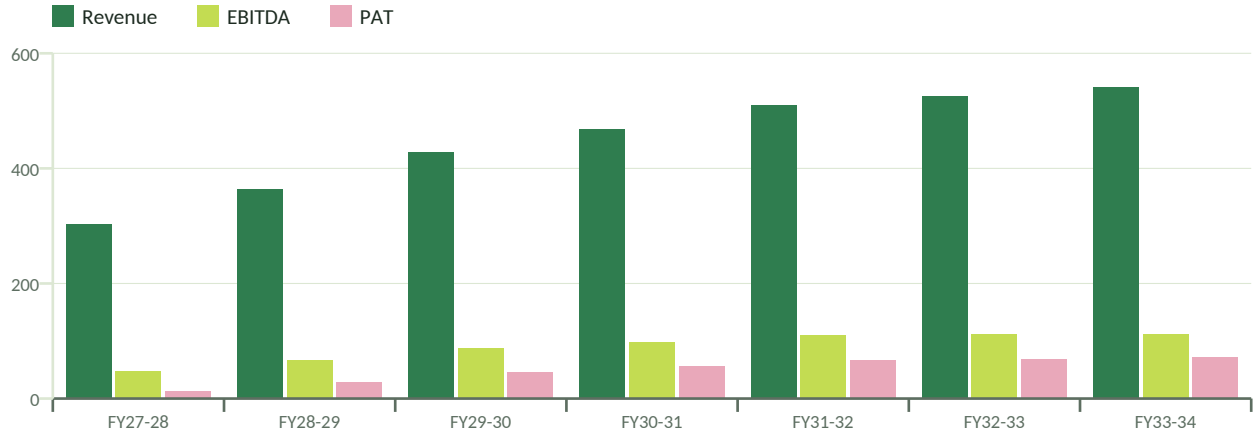

Means of finance

Debt to equity at the start of the project is 1.74 : 1.

9 Profitability Projections

Revenue is projected to grow from ₹302.40 L in FY27-28 to ₹541.62 L in FY33-34, a compound growth of about 10.2% a year, driven by higher capacity utilisation and price escalation. EBITDA margin ranges between 15.5% and 21.6%. Profit after tax is ₹13.88 L in the first year and ₹71.49 L by FY33-34.

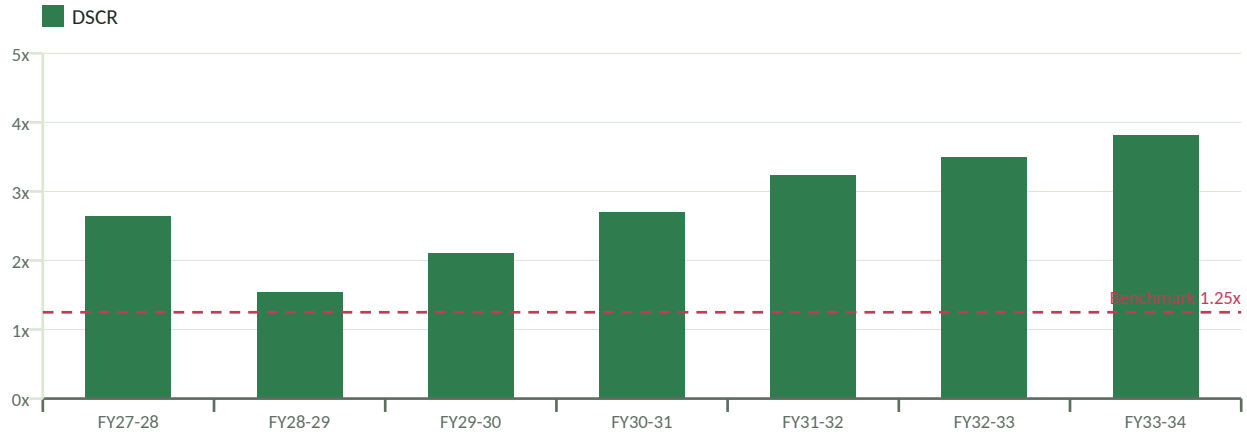

Revenue, EBITDA and profit after tax (₹ lakhs)

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
Revenue	302.40	363.38	427.75	468.12	510.53	525.85	541.62
Raw material	140.40	168.71	198.60	217.34	237.03	244.14	251.47
Manpower	55.15	58.46	61.97	65.69	69.63	73.81	78.23
Power & utilities	20.74	24.92	29.33	32.10	35.01	36.06	37.14
Other expenses	39.18	44.58	50.27	54.21	58.35	60.50	62.73
EBITDA	46.93	66.71	87.58	98.78	110.52	111.34	112.05
Depreciation	11.04	11.04	11.04	11.04	11.04	11.04	11.04
Interest	16.73	15.65	13.49	11.41	9.43	7.45	5.47
Profit before tax	18.55	39.42	62.45	75.73	89.44	92.85	95.53
Tax	4.67	9.92	15.72	19.06	22.51	23.37	24.05
Profit after tax	13.88	29.50	46.73	56.67	66.93	69.48	71.49
Cash accruals	24.93	40.54	57.78	67.71	77.97	80.52	82.53

10 Financial Analysis and Debt Service Coverage

The average Debt Service Coverage Ratio (DSCR) over the loan period is 2.69×, against a lender benchmark of 1.50×. The minimum DSCR is 1.54×, above the minimum benchmark of 1.25× in every year.

The project's internal rate of return (pre-financing) is 17.9% and the payback period is 3.6 years. Break-even is reached at 63% of sales in FY29-30.

Debt service coverage ratio by year

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
DSCR	2.64×	1.54×	2.11×	2.71×	3.23×	3.50×	3.82×
Interest coverage	2.80×	4.26×	6.49×	8.66×	11.72×	14.94×	20.48×
Current ratio	1.76×	2.05×	2.59×	3.32×	4.17×	5.07×	5.99×
Debt / equity	1.51×	0.92×	0.51×	0.29×	0.15×	0.06×	0.00×
TOL / TNW	2.15×	1.42×	0.89×	0.57×	0.37×	0.24×	0.15×
EBITDA margin	15.5%	18.4%	20.5%	21.1%	21.6%	21.2%	20.7%
Net profit margin	4.6%	8.1%	10.9%	12.1%	13.1%	13.2%	13.2%
Return on capital employed	16.4%	24.9%	31.0%	31.0%	30.2%	26.7%	23.7%

11 Loan Repayment Schedule

The term loan of ₹125.00 L carries interest at 9.5% a year and is repayable over 7 years, including a moratorium of 12 months, in 72 monthly instalments of ₹1.74 L principal plus interest.

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
Opening balance	125.00	125.00	104.17	83.33	62.50	41.67	20.83
Interest	11.88	10.97	8.99	7.01	5.03	3.05	1.07
Principal repaid	0.00	20.83	20.83	20.83	20.83	20.83	20.83
Closing balance	125.00	104.17	83.33	62.50	41.67	20.83	0.00

12 Working Capital Assessment

Working capital is assessed on the holding-period method: raw material 30 days, work in progress 7 days, finished goods 15 days, receivables 60 days, and creditors 30 days.

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
Current assets	74.29	88.80	104.11	113.81	124.00	127.84	131.81
Creditors	11.54	13.87	16.32	17.86	19.48	20.07	20.67
Working capital gap	62.75	74.93	87.79	95.95	104.52	107.78	111.14
MPBF Method I	47.06	56.20	65.84	71.96	78.39	80.83	83.36
MPBF Method II	44.17	52.73	61.76	67.49	73.52	75.82	78.19
Turnover method (20%)	60.48	72.68	85.55	93.62	102.11	105.17	108.32
Proposed limit	44.00	44.00	44.00	44.00	44.00	44.00	44.00

13 Past Performance and Reconciliation

Year	Revenue	EBITDA	PAT	Net worth	Debt
FY 2023-24	182.00	25.50	13.50	68.00	19.00
FY 2024-25	215.00	31.20	17.50	85.50	14.00
FY 2025-26	248.00	37.00	21.80	107.30	9.00

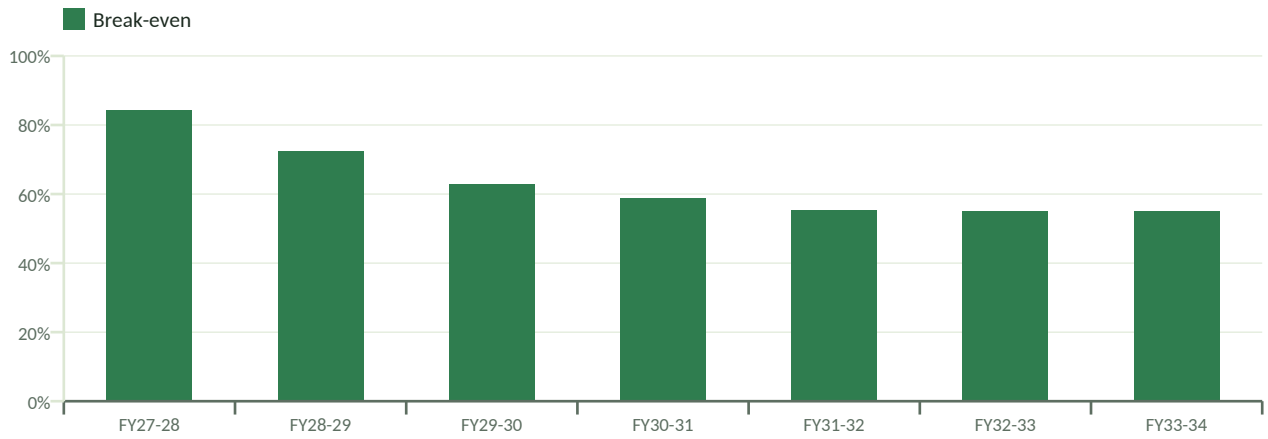

Year	GST vs books	ITR vs books	Bank credits vs books
FY 2023-24	0.8%	0.0%	3.3%
FY 2024-25	0.5%	0.0%	2.8%
FY 2025-26	2.0%	0.0%	10.9%

Basis for projected growth: New CNC capacity (2 turning centres + VMC) and a supply agreement with an existing pump OEM for 2,000 shafts per month.

14 Sensitivity and Break-even Analysis

The project has been tested against adverse changes in revenue, raw material prices and interest rates to see how debt service coverage holds up.

Scenario	Average DSCR	Minimum DSCR	FY29-30 PAT	FY29-30 break-even
Base case	2.69×	1.54×	46.73	63%
Revenue −10%	1.48×	0.84×	18.03	82%
Revenue −20%	0.12×	-0.94×	-16.68	119%
Raw material +10%	2.08×	1.17×	31.87	71%
Raw material +20%	1.48×	0.84×	17.98	82%
Interest +2%	2.53×	1.44×	44.64	64%
Revenue −10% and raw material +10%	0.88×	0.04×	3.02	97%

Break-even as % of sales

₹ lakhs	FY27-28	FY28-29	FY29-30	FY30-31	FY31-32	FY32-33	FY33-34
Sales	302.40	363.38	427.75	468.12	510.53	525.85	541.62
Variable costs	183.82	220.89	260.01	284.55	310.33	319.64	329.23
Contribution	118.58	142.50	167.74	183.57	200.20	206.21	212.39
Fixed costs	100.03	103.08	105.29	107.84	110.76	113.36	116.86
Break-even sales	255.08	262.85	268.50	275.01	282.45	289.08	298.01
Break-even % of sales	84.4%	72.3%	62.8%	58.7%	55.3%	55.0%	55.0%
Cash break-even % of sales	74.5%	64.2%	55.8%	52.4%	49.5%	49.6%	49.8%

15 SWOT Analysis

Strengths

- Promoter experience of 18 years in the field
- Established technology and machinery available locally
- Healthy average DSCR of 2.69×
- Location close to customers and suppliers

Weaknesses

- Expansion requires management bandwidth
- Initial dependence on a few customers
- Working capital needs during ramp-up

Opportunities

- Growing domestic demand for the products
- Preference for local and MSME suppliers in procurement
- Scope to add products and capacity in later years

Threats

- Price competition from established players
- Raw material price volatility
- Delays in receivables from customers

16 Risk Analysis and Mitigation

Risk	Impact	Mitigation
Raw material price volatility	Medium	Quarterly price contracts with two approved suppliers
Customer concentration	High	Add two new OEM customers by Year 2; cap single customer at 40% of sales
Working capital stress from delayed receivables	Medium	Credit limits per customer, invoice discounting on TReDS
Machinery downtime	Medium	Annual maintenance contracts and critical spares stock
Skilled operator attrition	Low	In-house training cell and retention bonus

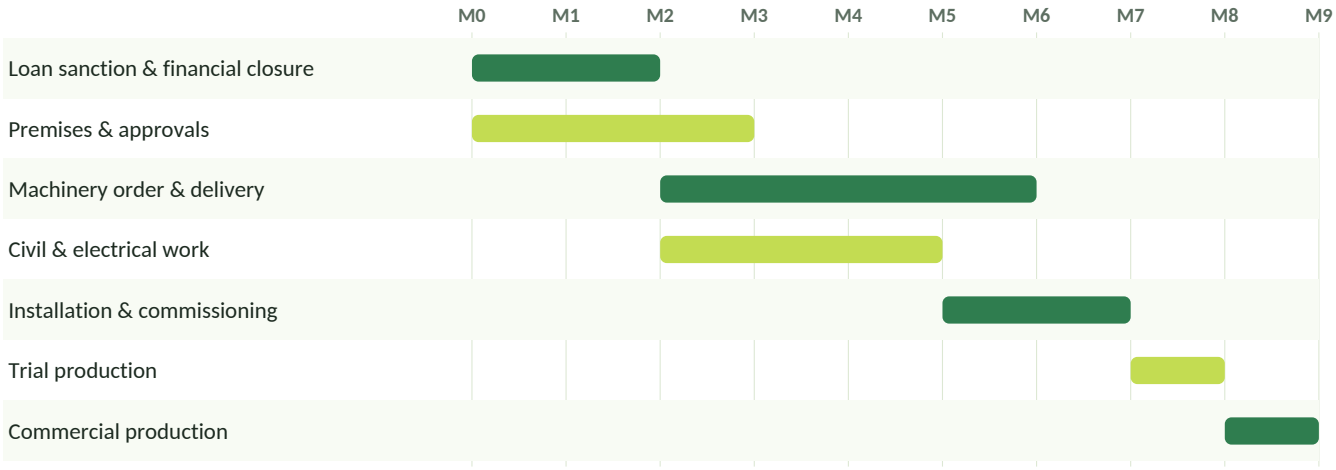

17 Statutory Approvals

The following registrations, licences and approvals apply to the project:

Licence / approval	Status
Tax registration (GST / VAT)	To be applied
Business / company registration	To be applied
MSME / small business registration (Udyam)	To be applied
Trade or shop licence	To be applied
Labour & social security (PF / ESI)	To be applied
Fire safety certificate	To be applied
Power connection sanction	To be applied
Factory licence	To be applied
Pollution control consent (CTE / CTO)	To be applied
Building plan approval	To be applied
Product standards (BIS / ISO)	To be applied

18 Implementation Schedule

The project is expected to be implemented in about 9 months from loan sanction.

Activity	Start month	Duration
Loan sanction & financial closure	1	2 months
Premises & approvals	1	3 months
Machinery order & delivery	3	4 months
Civil & electrical work	3	3 months
Installation & commissioning	6	2 months
Trial production	8	1 months
Commercial production	9	1 months

19 Conclusion

The project is technically feasible with proven equipment and a defined process. Projected cash accruals give an average DSCR of 2.69×, with break-even at 63% of sales by FY29-30. The promoters bring 36% of project cost as their own contribution. The project is recommended for financial assistance, subject to the assumptions and risks set out in this report.

Disclaimer. *This report has been prepared on the basis of information, estimates and assumptions provided by the promoters. Projections are estimates and actual results may differ. The report does not guarantee sanction of any loan; lenders will make their own assessment.*
